

COOLGUARD COOLANT (CONCENTRATE)

COOLANTS / CONCENTRATE

PRODUCT DESCRIPTION

EXL Power genuine long Life Antifreeze Coolant is a new generation fully Mono Ethylene Glycol based premium Engine coolant formulated specially for all Four Wheel Engines and Generators meets all requirements. Completely drain And flush Coolant from vehicles cooling line. Install Coolant in Four Wheel Engines by diluting up to 5 parts(1:5), with soft clean Water and in Generators fill up diluting up to 15 parts, with soft clean water radiator till full (1:15).

APPLICATIONS

Recommended for all type of passenger cars, light and heavy-duty vehicles and heavy generators to get maximum performance, it is recommended to rinse the circuit before refilling if it contains another product.

PERFORMANCE LEVEL

- COOLGUARD COOLANT CONCENTRATE fully Mono Ethylene Glycol based
- Makes Engine Work Better Last Longer

BENEFITS

- Very Rapid Heat Transfer Over Wide Temperature Range.
- Protection From Rust & Corrosion for all Metals.
- Increased Engine Life.
- Better Performance.
- Antifreeze Performance Up To - 20°C.

TYPICAL PROPERTIES

CHARACTERISTICS	CONCENTRATE
Density @ 20°C, kg/l	1.067
Appearance	Fluorescent Green
pH	8.20
Pour Point (°C)	-20
Boiling Point (°C, COC)	174

This bulletin was prepared in good faith from the best information available at the time of issue. While the values and characteristics are considered representative, some variation, not affecting performance, can be expected. It is the responsibility of the user to ensure that the products are used in the applications for which they are intended.
